ABSTRACT

This research is aims to determine application financial technology (fintech) and good corporate governance, and development of profitability in PT. Bank Central Asia Tbk period 2011-2017. And to determine influence in partial and simultan about financial technology (fintech) and good corporate governance of profitability in PT. Bank Central Asia Tbk period 2011-2017. Financial technology (fintech) and good corporate governance as independent variable and profitability as dependen variable.

This research method used is descriptive and verification method. The population is use annual report of PT Bank Central Asia Tbk. Determination of sample in this research is used non probability sampling with a purposive sampling method, and sample in this study is the annual report of PT Bank Central Asia Tbk for the 2011-2017 period. Analysis data in this study used multiple linear regression analysis at significance level of 5%. As the analysis data using Eviews 9.

The result of analysis shows that partially and simultan financial technology (fintech) and good corporate governance have an effect on profitability. In addition, the results of research show the magnitude of the influence of financial technology (fintech) and good corporate governance in contributing influence on profitability is 89.8%.

Keywords: Financial Technology (Fintech) and Good Corporate Governance, and Profitability.
